

Hand-waving flags

A stick flag printed on polyester flag fabric will always have a mirror image of the flag on the reverse side. Double-sided printing is not possible because the flag fabric is translucent. We can customize both sides of a paper hand-waving flag, but they are unsuitable for outdoor use.

Add 0.25" of bleed/margin to the size of the flag throughout, and a separate 0.25" is needed around the pole for attaching the flag.

Width x Height

Add 0.25" to the top, right, and bottom edge and 0.5" to the left for the pole.

For example, 6" x 8" flag, artwork size should be 6.5" x 8.75"cm
