

Wooden Luggage Tags

The printing is always in full color, including base white or visible white. This ensures that the colored parts are printed in a color-correct fashion. If your design requires transparency or there are certain areas where you wish to show wood instead of white, mark those areas clearly in your artwork. Supply graphics in vectorized file format in CMYK colors.

Personalization is available for this product. Names and other such information should be supplied primarily as an Excel sheet.

Side A

IMPORTANT!

Wooden Luggage Tags are made with natural wood. As with all things from nature, perfect imperfections affect the shape of the product. Due to minor changes, like a slightly concave shape, the printing position might show slight movement between each tag. Avoid graphics that follow the edge of the product to make the movement less visible.

Product dimensions: 2.75" x 4" inches
