

Woven Round Lanyard

The soft, round lanyard is woven in 1-2 colors that you can define yourself according to Pantone color codes. Not all colors are available; however, we will select the closest match to your digital proof before production. Check the proof carefully before proceeding with production.

The lanyard also has a collar that can be attached to a woven fabric label with your logo. The fabric label can have 2-3 colors, including the base color. The collar can also be made in a different color. A safety buckle is optional and can be placed at the neck or halfway on one side of the lanyard.

The thickness of the lanyard depends on the coloring and weaving, between 0.2-0.25" inches.
